Manual Test Plan
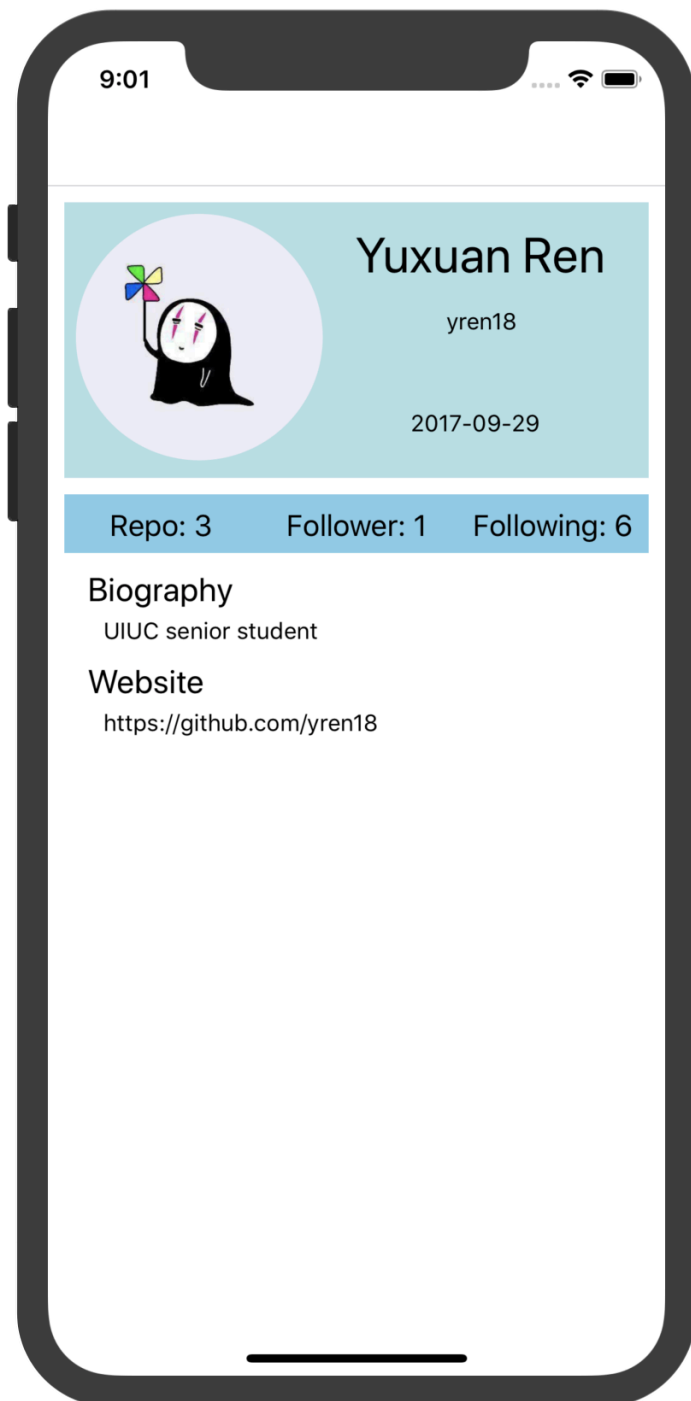

When user opens the application, the app will be on the profile page.

The user can see his/her:

1. Github Username   2. Email
3. Avatar   4. Biography
5. Website   6. Github Create Time
7. Count of Repositories, Followers and Following

After clicking on the 'Repo: count', it will direct to the repository page: A list of user's public repositories will be shown, where name, owner name, and description of each repository are included.
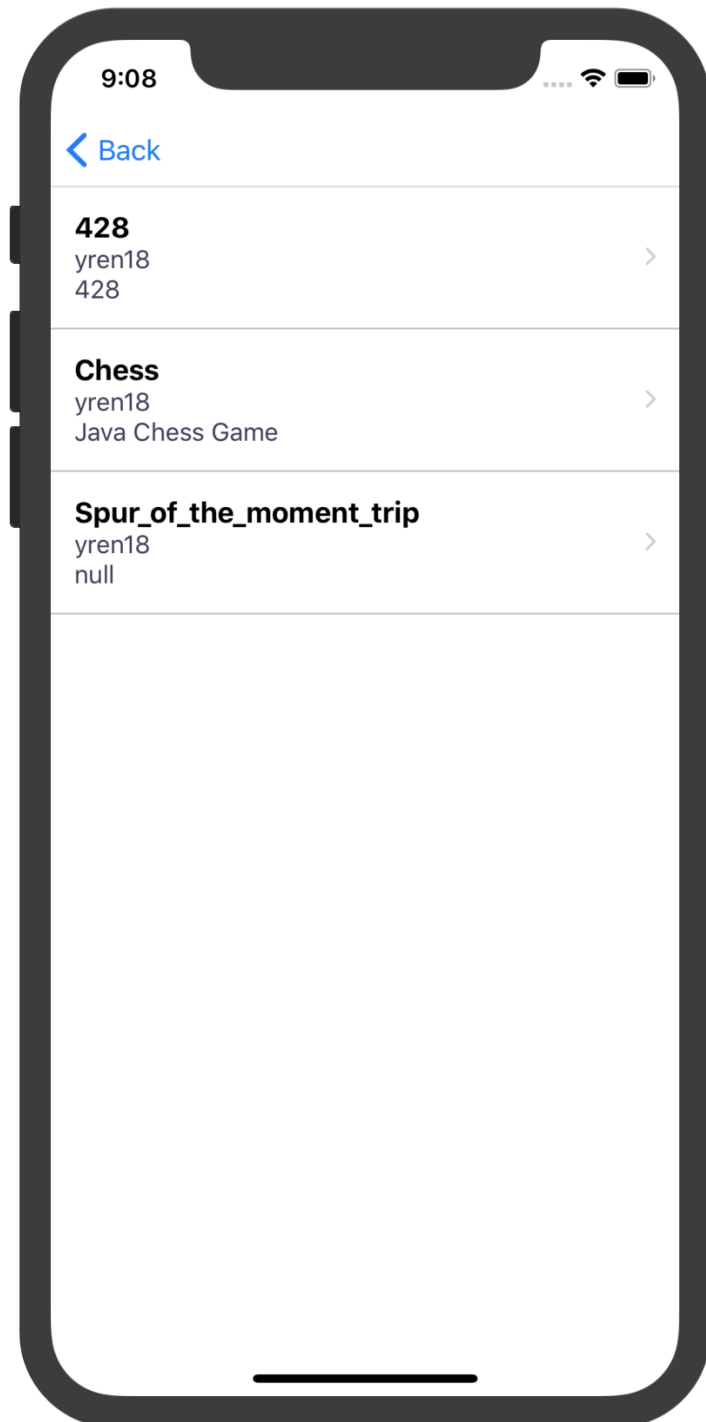

After clicking on the 'Follower: count', it will direct to the follower page: A list of users who follow the user will be shown, where username and avatar of each follower are included.
